

Risk Control > Safety Academy

Build a stronger business foundation with expert safety training.

Travelers created the Safety Academy because education is one of the most important steps an organization can take toward reducing safety risks and controlling costs. The Safety Academy has a course catalog of more than 100 classes in the following categories of safety topics:

- > Safety Management
- > Effective Supervision
- > Ergonomics
- > Industrial Hygiene
- > Construction Safety
- > Post-Injury Management
- > Fleet Safety

Each program is designed based on best practices, research, the experiences of successful customers and applicable regulations and standards. Our instructors are experienced, hands-on safety professionals who use effective training techniques to ensure training is relevant and easily applied to your business.

Our customers have the option of classes presented at their business location or can attend one of the more than 300 regional seminars. Our regional seminars are a great networking opportunity for our customers to learn from other companies while participating in focused training session led by a Travelers' instructor. Many of these regional seminars include presenters from multiple areas of Travelers, including Risk Control, Legal Counsel, Claims and Underwriting.

In addition to on-site and regional courses, Travelers Safety Academy keeps pace with today's technology offering:

Web-Based Training

Web-based training is a cost-effective training solution that allows customers to take classes when it fits their schedule and without having to leave their office. We offer approximately 130 Web-based

training titles; the catalog of courses is a mix of complimentary and fee-based classes.

Computer-Based Training

We offer several training programs on CD. The benefits of a CD-based program include the ability to easily provide training to remote staff, convenient scheduling flexibility for employees, combined with the ease of using the training materials without having to log on to a Web site or server.

Online Training

Our Safety Academy is now electronic. We offer Webinars and online learning events for our customers. These one-hour, online classes, are designed to help our customers stay current with emerging issues in risk control. Each of these events permits participants to view a presentation online while listening to the commentary of the presenters over the telephone. Using this technology allows us to provide a cost-effective training solution when the attendees are located in remote areas or a quick refresher on a safety topic as needed.

Videos and DVDs

An extensive library of videos and DVDs are available for a modest rental fee. The typical four-week rental includes a facilitator's guide and sample student workbook. This is a complete package of training materials that will enable you to get the most out of using the video presentations as part of your training activities.
