EnergyMax 21

EQUIPMENT BREAKDOWN INSURANCE FOR THE 21ST CENTURY
Your clients have everything they need to keep their businesses moving forward. They possess the know-how, the human resources and the infrastructure necessary to remain out in front in today’s hyper-competitive world. But how well prepared are they for the inevitable – and sometimes literal – monkey wrench, which is breakdown of their equipment?

Travelers EnergyMax 21 is a broad package of specific coverages for a wide variety of equipment loss scenarios, driven by a singular goal: maintaining the momentum needed to succeed in the 21st century.

Think of it this way: your client’s business is an automobile racing team. Management is the driver, infrastructure the car and EnergyMax 21 the pit crew. No matter how much talent is behind the wheel, no matter how much horsepower the engine makes, it’s impossible to take the checkered flag with a couple of flat tires and a broken fuel line. Make Travelers EnergyMax 21 part of your client’s winning team.

Many potential challenges – one effective solution
From air conditioning and refrigeration equipment to computers, production machinery, telecommunications and other business equipment, for every industry from pharmaceutical manufacturers to hotels, Travelers EnergyMax 21 is the answer to some of the most difficult equipment breakdown questions for businesses of all shapes and sizes, including those that have yet to be asked.

IndustryEdge® – a competitive advantage
Your clients need the kind of great coverage, responsive claim services, risk management, boiler inspection and engineering services that Travelers delivers. They also need the tools to establish and then maintain a competitive advantage.

Under the banner of Travelers IndustryEdge – a suite of specialized insurance products and services customized to the particular needs of a broad spectrum of industries – EnergyMax 21 provides finely tuned coverage for the complexities of doing business in a rapidly changing world.

EnergyMax 21 scalability
Travelers EnergyMax 21 is completely self-contained. That is to say, your clients won’t need to choose from a long, confusing laundry list of coverage options. Customized plans for very specific and high-challenge risks are rarely a problem because just a few tweaks to EnergyMax 21 can provide your clients the needed coverage.

The key equipment breakdown coverages chart on the far right details a broad range of coverages. Elsewhere in this brochure there is an overview of the value added by EnergyMax 21. Still, the only way to completely understand just how well prepared we are to provide security and peace of mind for your specific business is to speak to a Travelers Boiler & Machinery account executive. To find one near you, call 800.253.1304 or visit travelers.com/boiler.
EnergyMax 21 is to traditional boiler and machinery coverage what an MP3 player is to a phonograph. In this fast-paced, digital age, solutions that worked yesterday were obsolete this morning and almost completely useless this afternoon.

We have the expertise to understand the true scope of your clients’ exposures. And – with the combination of IndustryEdge and EnergyMax 21 – the right answers to help you put together a business-specific coverage package loaded with truly innovative features that will protect them today and tomorrow, including:

- **New Generation Coverage** –
  Up to 125% of replacement value of unrepairable equipment for upgrades to state-of-the-art technologies.

- **Green Coverage Upgrade** –
  An extra 5% – up to $25,000 – above the covered amount of loss to help make the switch to proven environmentally friendly alternatives. Your account executive can help you with requests for increased limits.

- **Property Damage Coverage for Fungus** –
  Automatic coverage of $15,000 per covered location with increased limits available.

- **Selling Price Valuation** –
  Expanded to include all property held for sale.

EnergyMax 21 is one of the most progressive and wide-ranging equipment breakdown protection packages available.

Protecting against risks that didn’t exist or were not even recognized just a few years ago, EnergyMax 21 moves equipment breakdown coverage solidly into the 21st century. Our strategy is to do more than help businesses to avoid interruptions; we focus on helping them become better prepared for the future.

And while EnergyMax 21 covers some very sophisticated equipment and systems, your clients will have no problem understanding the many benefits. To learn more, call 800.253.1304 or visit travelers.com/boiler.
### Risks

<th>Boilers and pressure vessels</th>
<th>Air conditioning and refrigeration equipment</th>
<th>Business and computer equipment</th>
<th>Electrical equipment</th>
<th>Mechanical equipment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nearly all business enterprises, including manufacturing, retail and service, as well as occupancies such as apartments, churches and fraternal organizations, depend on boilers or other fired pressure vessels to provide hot water or steam for comfort heating, domestic hot water or manufacturing operations.</td>
<td>Air conditioning is essential to businesses for the comfort and health of employees, clients and customers, and in many cases, for the trouble-free operation of information technology equipment. For most businesses requiring refrigeration for anything more than keeping the coffee creamer cold, any interruption of service is a big problem.</td>
<td>Today's sophisticated business equipment – from computer-controlled communications systems to building management apparatus – allows enterprises of all types to be extraordinarily productive.</td>
<td>With near universal use, it's no surprise that electrical system breakdowns are among the most common and costly types of equipment breakdown losses. And because electricity is the lifeblood of most every other type of equipment, problems often drive other losses and expenses covered by EnergyMax 21.</td>
<td>Most commercial and manufacturing operations rely heavily upon mechanical equipment, and the range of apparatus and systems that fall into this category is truly astonishing. While other coverage forms may struggle to keep up with the pace and complexity of covering the ever-growing range of modern machinery, EnergyMax 21 was built for customization to stay one step ahead.</td>

<th>Electrical equipment</th>
<th>Mechanical equipment</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Boiler damage due to scale buildup inside the tubes</td>
<td>• Damage to electric motor due to single phasing</td>
<td>• Circuit board damage caused by voltage spike</td>
<td>• Motor damage due to single-phase operation or loss of lubrication</td>
<td>• Coupling damage due to overload</td>
</tr>
<tr>
<td>• Cast iron boiler “burnout” due to malfunction of the low water fuel cutout</td>
<td>• Damage to compressor due to liquid slugging or lack of lubrication</td>
<td>• Damage of control systems due to ground fault</td>
<td>• Cable or bus duct damage due to loose connections or insulation deterioration</td>
<td>• Gear tooth damage due to misalignment or inadequate lubrication</td>
</tr>
<tr>
<td>• Air tank damage from cracking due to external vibration</td>
<td>• Heat exchanger tube rupture</td>
<td>• Computer system damage due to poor contacts or lack of maintenance</td>
<td>• Generator damage due to winding burnout or prolonged overload</td>
<td>• Mechanical press frame damage caused by double blanking or overload</td>
</tr>
<tr>
<td>• Hot water heater overheating and rupture due to control error</td>
<td><strong>Example:</strong> A water heater at a popular restaurant ruptured due to a control breakdown and malfunctioning relief valve. The building also suffered water damage. Repair cost: $72,000 Lost business income: $42,100</td>
<td><strong>Example:</strong> A 200-ton A/C system servicing an office building froze due to a control breakdown. A rental unit was brought in until the main unit was back in service. Repair cost: $31,000 Rental expenses: $11,500</td>
<td><strong>Example:</strong> An emergency generator at a hospital failed during a test. The unit needed to be completely rewound. A rental unit was required until repairs were completed. Repair cost: $31,000 Rental expenses: $8,900</td>
<td><strong>Example:</strong> The tail stock on a large lathe at a mid-size machine shop failed due to fatigue, dropping a turbine rotor while it was being machined. Replacement cost: $138,900 Extra operating expenses: $25,000</td>
</tr>
