These claim scenarios are hypothetical. Refer to the terms and conditions of the applicable policy and the actual facts of the claim to determine coverage.

CLAIM SCENARIO ONE: You design a radio unit that is integrated into a wireless telephone system. Contractors install a capacitor into your radio unit incorrectly as a result of an error in your schematics, causing failures to occur. Between 12,000 and 14,000 units are installed by the time the problem is discovered. Your client asserts a claim seeking to recover damages resulting from the failures.

CLAIM SCENARIO TWO: You develop enterprise labor force software to integrate with a client’s HR and payroll systems. You fall behind in delivering the work, resulting in missed milestones and nonfunctioning project modules. You contend that the client repeatedly changed the size and scope of the project. Ultimately, the client fires you and files a lawsuit, seeking to recover lost profits due to the disruption.
