Drawing the Line on Crane Safety Lift Planning

(SPEECH)

[MUSIC PLAYING]

(DESCRIPTION)

Text, Drawing the Line on Safety. Lift Planning. Travelers.

(SPEECH)

SPEAKER 1: None of us are as smart as all of us. One smart crane operator may not be enough. You and other members of your lift team should know what your operator knows. Does your team understand the lift plan and what can affect the operation?

People often think of planning only when heavy loads are involved. The fact is lifts involving light loads placed at long radii can just as easily end in failure. What's more, variables like power lines, weather, and wind make smart lift planning essential and educating all members of your safety team critical. Your success can depend on your team being prepared.
